## **Harvard Business School's mission is to educate leaders who make a difference in the world.**

Every day more than 90,000 graduates strive to make these words a reality in a wide array of organizations that improve the lives of millions of people around the globe. For more than 50 years, the School has selected a number of these graduates to receive its most important honor, the Alumni Achievement Award. Throughout their careers, these distinguished graduates have contributed significantly to their companies and communities while upholding the highest standards and values in everything they do. As such, they represent the best in our alumni body. Exemplary role models, they inspire all those who aspire to have an impact on both business and society.

# PETER O. CRISP

## **MBA 1960**

Cofounder and Former Managing Partner,  
Venrock Associates

Peter Crisp downplays his many successes and contributions over the decades. His life is boring, he jokes: He had one employer throughout his 45-year career, has been married to his wife, Missy, for 60 years, and has lived in the same house for nearly as long. While these facts are certainly true, they don't come close to encompassing what Crisp has achieved over his lifetime.

## TIMELINE

- 1932** Born in New York City
- 1955** Earns BA, History, Yale University
- 1956** Serves three years as Intelligence Officer, US Air Force
- 1960** Earns MBA
- 1960** Joins Rockefeller Family & Associates
- 1967** Joins Board of Memorial Sloan Kettering Cancer Center
- 1969** Cofounds Venrock Associates
- 1980** Named President, Venrock
- 1980** Joins board of Apple
- 1995** Named Chairman, Venrock
- 1997** Named Vice Chairman, Rockefeller Financial Services
- 2004** Receives Lifetime Achievement Award, National Venture Capital Association
- 2005** Steps down as Director, Rockefeller Financial Services
- 2008** Chairman, Jupiter Medical Center Foundation
- 2021** Gift to Harvard Innovation Labs

### FROM TOP:

Crisp speaking for the HBS Skydeck podcast; hitting the links in Hobe Sound, Florida; relaxing at home with his wife of 60 years, Missy Crisp.

Growing up on Long Island, Crisp was curious, adventurous, and determined, soloing in a single-engine airplane at age 14. He's still amazed he was allowed to do so; just two years earlier, the family had lost his older brother to leukemia. "Both my parents were a principal influence, yet they weren't overbearing or demanding," he says. "In fact, they were very permissive. But my father always made it clear that I had to work." Crisp did so from age 12, earning \$4 a day doing yard and maintenance work at a neighboring property; as a college student, he and a friend worked summer jobs in the Texas oil fields and at an Idaho lumber mill. "We were the Eastern college boys, put on the toughest assignment to see if we could stand up to it," Crisp recalls. "We learned the value of hard labor and respect for the other workers."

Between his first and second years at HBS, Crisp worked at Swissair in Zurich. There he read an article about Laurance Rockefeller's early investments in what would become Eastern Air Lines and McDonnell Douglas. Crisp was intrigued. He wanted to make a difference and was considering foundation work as a post-MBA path. But his father suggested he consider making his own money to give away. In Rockefeller, Crisp saw someone who was doing just that; plus, he too seemed fascinated by aviation and new technologies. Crisp wrote Rockefeller a letter, expressing his interest. "I guess [Rockefeller] decided having this HBS guy clean up the files was a good idea," Crisp says with a smile. "My annual salary was \$6,500, less than what my classmates going into consulting and banking would be making. But it seemed like it would be fun—and it turned into quite an amazing relationship for me over the years."

Rockefeller and his family had been investing and giving back well before Crisp came onboard in 1960. At the time, what would become the venture capital industry was in its infancy. By 1969, however, the dealmaking environment had begun to heat up. With an increased need for agility and efficiency,

Venrock Associates was launched with a \$7.5 million investment from the Rockefeller family and a few associated nonprofits. Over the years, the firm invested in a roster of companies that included Thermo Electron (now Thermo Fisher Scientific), Intel, and American Semiconductor, among many other household names. Crisp recalls a 1979 pitch by Steve Jobs and his early associates from Apple. "We knew they were smart, and the concept of a PC was unusual at the time—so we went ahead," says Crisp. Venrock paid \$300,000 for a 10 percent stake in the company, and Crisp served on the company's board for 16 years.

**"I feel lucky to have been in the venture business as long as I was."**

With that success and many others, Crisp has been able to give back, just as he'd hoped to do. In addition to sitting on more than 40 corporate boards, he has offered his finance, strategy, and leadership expertise to dozens of nonprofits. In 1967, at the suggestion of Laurance Rockefeller, he joined the board of Memorial Sloan Kettering—the same hospital where his brother was treated years earlier. Over the course of a remarkable 42 years, Crisp served on virtually every committee at the hospital while taking time to meet with staff and learn about the institution from the ground up. More recently, he's made a difference closer to his home in Hobe Sound, Florida, chairing a \$50 million capital campaign for the Jupiter Medical Center Foundation.

"I feel lucky to have been in the venture business as long as I was," Crisp reflects. "You get to advance technology, support brilliant people, create jobs, and return the money you make to truly deserving causes. It doesn't get much better than that."

# JOHN B. HESS

**MBA 1977**

CEO, Hess Corporation

John Hess has always been fascinated by the energy business. At age 15, he was pumping gas, washing windshields, and popping hoods at a Hess station in New Jersey. "It was really fun. Frankly, I'd love to do that job again," says Hess, who is nearing his 30th anniversary as CEO of Hess Corporation.

## TIMELINE

- 1954** Born in Perth Amboy, New Jersey
- 1975** Receives AB, Economics, Harvard College
- 1977** Earns MBA
- 1977** Joins Hess Corporation
- 1984** Named Senior Vice President of Hess, managing exploration and production operations
- 1988** Joins board of Mount Sinai Hospital
- 1995** Named Chairman and CEO of Hess
- 2001** Joins the HBS Board of Dean's Advisors
- 2010** Joins board, Center for Strategic and International Studies
- 2014** Named Chair, HBS Capital Campaign
- 2022** Launches Guyana National Healthcare Initiative
- 2023** Announces merger of Hess with Chevron
- 2024** Appointed Chair, American Petroleum Institute

### FROM TOP:

Hess speaks in Houston in March 2024 at CERAWeek, an international energy conference; the Hess Toy Truck is now a best-selling annual toy and holiday tradition; Hess celebrating with his wife, Susan, and family at their son's graduation from HBS.

“My father was the youngest of four children and when it was his turn to go to college, the Depression hit and there was no money left in the family,” he says. “In 1933, he bought a secondhand truck and started delivering fuel oil; that was the founding of our company.”

Hess was eager to go to college and get his MBA “to prepare me for the business world,” he says. At Harvard College and HBS, Hess learned the language of business—and the languages of the countries where the company did business. “In high school, I learned Spanish; in college, I learned Arabic; and at HBS, I learned Farsi. I had no idea at the time that this investment in languages would be one of the smartest things I ever did,” he says. As a leader, trying to understand and appreciate the cultures of the countries where you do business is “key to building bridges of trust,” especially in an industry as far-reaching as oil and gas. “Energy is the engine that drives the world’s economy, lifts people out of poverty, and improves quality of life.”

As Hess Corporation’s CEO, Hess led the Fortune 500 company through a strategic transformation to become a leading global independent exploration and production company. HBS reinforced his belief in the power of business to be a force for good in society—a belief that is core to Hess Corporation’s values. “Our company’s purpose is to be the world’s most trusted energy partner that makes a positive social impact on the communities and countries where we do business,” he says.

One such country has been Guyana, on the northern coast of South America, where, over the last

decade, Hess Corporation and its partners have discovered an estimated resource base equivalent of more than 11 billion barrels of oil. The burgeoning oil and gas industry is transforming the nation’s economy. “On my first visit to Guyana years ago, I pledged on behalf of Hess Corporation to work with Guyana’s government to ensure that the country’s oil treasure truly becomes the people’s treasure,” Hess says.

In 2022, Hess Corporation and Guyana’s government announced an initiative to modernize the health care system in the country, in partnership with Mount Sinai Health System. Among the first programs rolling out is comprehensive youth health screenings—including vision, hearing, and dental evaluation—that will benefit more than 98,000 nursery, primary, and secondary schoolchildren across all regions of Guyana.

Hess Corporation is also protecting Guyana’s vast forests, which are estimated to store approximately 20 billion tons of carbon dioxide equivalent. In 2022, the company committed to purchasing \$750 million in carbon credits over 12 years, one of the largest private sector forest preservation agreements in the world. “Saving the world’s forests and the important role they play as natural carbon sinks is foundational to the Paris Agreement’s aim of limiting the global average temperature rise to well below two degrees Celsius,” Hess says.

In October 2023, Hess Corporation agreed to a merger with Chevron Corporation. When that transaction closes, Hess will still be in the energy business: He plans to join the Chevron board and remain active in the industry. “Oil and gas will be needed for decades and are fundamental to an affordable, just, and secure energy transition,” says Hess. “The world has a massive dual challenge—we need about 20 percent more energy globally by 2050 and we need to reach net-zero emissions in the same period. Business leaders and government officials must come together and have climate literacy, energy literacy, and economic literacy to have an orderly and affordable energy transition.”

**“Energy is the engine that drives the world’s economy, lifts people out of poverty, and improves quality of life.”**

# DESIREE ROGERS

## **MBA 1985**

Co-Owner, CEO, Black Opal LLC

When Desiree Rogers graduated from Harvard Business School in the 1980s, the investment banking and consulting industries were booming. As many of her classmates migrated to New York, Rogers followed a different track, heading for an operations job at AT&T in Chicago. “Ultimately, I wanted to run a company. It seemed like the best way to accomplish that goal,” she says. That experience taught Rogers an important lesson early in her career: “The seat you take might be very different from everyone else’s seat. Claim it.”

**FROM TOP:**

Rogers relaxing at her home in Chicago; discussing a Fashion Fair product line; catching up on email.

**TIMELINE**

- 1959** Born in New Orleans, Louisiana
- 1981** Earns BA, Political Science, Wellesley College
- 1985** Earns MBA
- 1991** Appointed Director, Illinois Lottery
- 1996** Joins Peoples Energy
- 2003** Named President, Peoples Energy
- 2008** Joins Allstate Financial as President, Social Networking
- 2009** Appointed Special Assistant and Social Secretary to the President of the United States
- 2010** Named CEO, Johnson Publishing Company
- 2013** Appointed Chair, Choose Chicago
- 2018** Named Director, Stagwell
- 2019** Purchases Black Opal LLC with Cheryl Mayberry McKissack
- 2024** Joins American Cancer Society Board of Directors

Rogers grew up in the historic Seventh Ward of New Orleans as part of a tight-knit family; her maiden name, Glapion, traces back to famed voodoo queen Marie Laveau. “As children, going to school, doing well, and studying hard was our job,” she says. “That was the cornerstone, although we also enjoyed everything the city had to offer in terms of food and culture.” That included Mardi Gras, of course, where Rogers ruled twice as Queen Zulu.

Despite those deep roots, Rogers knew from a young age that she wanted to attend graduate school at Harvard. “My father very much wanted me to be a physician, but after my first biology class I knew that was not going to happen,” she recalls. A career in law didn’t resonate either—but one in business did. “I wanted to make decisions, move companies forward, and manage people,” she says. Once at HBS, Rogers recalls feeling all the typical anxiety around cold calls and speaking in class. “But I also remember the friendships, the study groups, and the sharing of ideas,” she adds. “Now, when I return for reunions, I appreciate the exchange of opinions even more.”

Over the course of her ongoing career, Rogers has held leadership roles across a range of mature industries, bringing an innovative perspective and strategy to each. As director of the Illinois Lottery, for example, Rogers introduced instant ticket partnerships, growing that category from \$300 million to \$600 million, and launched the Mega Millions game with five other states. “The throughline for me is taking a mature entity—utilities, insurance—and making it fresh and exciting for the next generation,” she says.

The same was true at the White House, where Rogers served as the first social secretary to President Barack Obama, executing over 350 events that

**“The seat you take might be very different from everyone else’s seat. Claim it.”**

reflected the administration’s inclusive spirit, including opening the Easter Egg Roll to participants from all 50 states, for example. In her next role, as CEO of Johnson Publishing, Rogers helped oversee the transition of *Jet* and *Ebony* magazines from print to digital.

That experience segued into Rogers’s current role as CEO of Black Opal LLC, which includes the brands Black Opal Beauty and Fashion Fair Cosmetics. Collectively, the two brands have an 80-year history with women of color; once again, she sees her charge as making the products inviting and relevant for a new audience. And while part of that will involve spreading the word about reimaged, re-engineered product lines, Rogers also emphasizes a more fundamental mandate: creating confidence and community.

“At the core of our work is the understanding that if you feel good about yourself, there’s nothing you can’t do,” she says. There’s power in coming together, adds Rogers. A breast cancer survivor, she has drawn attention to the lower survival rates of women of color, making it one of a series of Fashion Fair “hot topics” that focus on giving back to common causes. “The hard work is hard work, but that’s why I’m excited,” she says of the potential impact. “The real goal here is not just about having the perfect shade of lipstick—it’s about building trust and bringing people together to create change.”

# GERALD W. SCHWARTZ

## **MBA 1970**

Founder and Chairman,  
Onex Corporation

When Gerald Schwartz got his first job, at an auto parts shop in his hometown of Winnipeg, Manitoba, he was about 10 years old—barely old enough to see over the counter. His boss was his dad, Andrew. “He was through and through an entrepreneur,” Schwartz says, listing the multitude of businesses—from frozen food manufacturing to real estate—that his father was involved in. “And in my little kid way, I was a part of it.”

## TIMELINE

- 1941** Born in Winnipeg, Manitoba, Canada
- 1962** Earns Bachelor of Commerce, University of Manitoba
- 1966** Earns Bachelor of Laws, University of Manitoba
- 1970** Earns MBA
- 1971** Joins Bear Stearns
- 1977** Cofounds CanWest Capital, later CanWest Global Communications Corporation
- 1984** Founds Onex Corporation
- 1999** Establishes Gerald Schwartz School of Business and Information Systems at St. Francis Xavier University, Nova Scotia
- 2004** Inducted into Canadian Business Hall of Fame
- 2004** Founds Canadian Council for Israel and Jewish Advocacy
- 2006** Appointed Officer of the Order of Canada
- 2019** Announces Schwartz Reisman Innovation Centre at University of Toronto
- 2019** Dedication of Schwartz Common and Pavilion at HBS

### FROM TOP:

In 2019, Onex acquired Calgary-based Westjet for \$5 billion; Schwartz takes a break in his Toronto home office; with wife, Heather Reisman.

Schwartz didn't end up in auto parts; instead, he spent more than five decades in the finance sector, stepping down last year from his role as CEO of the private equity firm Onex. But the business lessons he learned behind the counter stuck with him throughout his career.

Schwartz started his first venture, a clothing store, when he was 17, but following in his father's entrepreneurial footsteps wasn't the only future he considered. At the University of Manitoba, he pursued medicine before earning a degree in commerce; he later studied law. Lawyers, though, seemed to "do the cleanup of a businessman's work," he says. "Why do the cleanup? Why not have fun and do the job?" When he enrolled at HBS, he met Professor Abraham Zaleznik, who articulated Schwartz's instincts even more succinctly. "To understand the entrepreneur, you first have to understand the psychology of the juvenile delinquent," Zaleznik famously said. Schwartz explains why this idea still resonates: "They don't like rules; they don't like to be regulated; they don't like to report to anybody. And when there's a road that has a fork in it, they want to choose which way to go."

The first fork in Schwartz's business career came shortly after he graduated from HBS in 1970. He took a position at a land development company in Florida. The job promised to be extremely lucrative, but Schwartz quickly realized he was in the wrong place. "I didn't like the way they treated their customers," he recalls. It went against what his father had taught him: "Take care of the customer; they'll take care of your business." He had two choices: ignore his reservations for the promised payday or take a risk on the unknown. He walked away. "It's pretty straightforward. Don't do anything in your life that you don't like doing or be with people you don't want to associate with. It was a hard lesson to come by. It came very close to costing me an entire career."

Schwartz hoped that the next step would be Wall Street, but the best-known firms had already filled their ranks with new business school grads. Instead, he joined a smaller firm as a steppingstone to a position at Bear Stearns in the early 1970s—the decade that would give birth to the modern private equity industry. Schwartz went on to cofound CanWest Capital, a Canadian media and private equity company, in 1977, and then, in 1984, he launched Onex.

Private equity allowed Schwartz to explore the wide-ranging interests he had developed watching his father's career as an entrepreneur: "One of the real benefits of the business was you were in so many different industries all at the same time, and so it was a great curiosity fulfiller." Today, the firm has nearly \$50 billion in assets under management, with offices in Canada, the United States, and the United Kingdom.

**"[My dad] was through and through an entrepreneur. And in my little kid way, I was a part of it."**

In his time at Onex, Schwartz was involved in countless notable deals, among them Beatrice Foods, SkyChefs, Celestica, and WestJet, but he also leaves a legacy for a different type of acquisition: art. Artwork fills his Toronto home, the Onex offices, and buildings at HBS. Over the last three decades, a gift from Schwartz to the School has enabled the purchase of more than 300 pieces, primarily from up-and-coming artists. Schwartz says exposure to painting and sculpture can help one think about problems differently, but mostly he loves it because "it's very happy-making."

# GWILL E. YORK

## **MBA 1984**

Founding Managing Director,  
Lighthouse Capital Partners

Growing up in Cleveland, Ohio, in the 1960s and 1970s, Gwill York enjoyed many things: taking her dog for long walks, playing sports, and satisfying her curiosity by reading about new topics at the library. Another favorite pastime? Touring local factories with her analyst father, Scott York (MBA 1959), to see how everything from ball bearings to auto fenders were made.

#### FROM TOP:

At Boston's Museum of Science, where York has been involved since 1986; at the Isabella Stewart Gardner Museum, where York serves as President of the Board of Trustees; relaxing at her home in Cambridge, Massachusetts.

#### TIMELINE

- 1957** Born in Boston, Massachusetts
- 1960** Moves to Cleveland, Ohio
- 1980** Receives AB, Economics, Harvard College
- 1980** Joins Salomon Brothers as analyst
- 1984** Earns MBA
- 1988** Opens Boston office of Comdisco Ventures
- 1994** Cofounds Lighthouse Capital Partners
- 2005** Joins board, New England Venture Capital Association
- 2009** Appointed HBS Entrepreneur-in-Residence
- 2013** Elected to Harvard University Board of Overseers
- 2015** Elected Chair, Museum of Science Board of Trustees
- 2018** Joins board, Sofina
- 2020** Named President, Isabella Stewart Gardner Museum Board of Trustees
- 2023** Founding Advisory Board Chair, 10 Million Names

"I loved learning how capital and labor came together to create things," says York, who at age 17 begged her parents for a solo trip to the former Soviet Union so she could witness a very different economic system. (They let her go.) That spirit of fearless discovery has propelled York's 30-plus years in venture capital—and it now spurs her commitment to driving strategy at multiple civic institutions, public companies, and nonprofit organizations.

York attended an all-girls school that instilled a simple message: "You'll hear that you can't do things because you're a girl, but ignore those people and go for it," she summarizes. York didn't need much encouragement in that regard. "As a kid, I was up for pretty much anything and was fairly confident that I'd do okay at it," she says. That included applying to HBS, where she set her sights from age nine. York arrived at Soldiers Field having tested the finance waters at Salomon Brothers, where she learned about leveraged buyouts and venture capital as well as the ins and outs of investment banking. "Venture seemed like the right place for me because it was a relatively new industry and there weren't as many preconceived notions around who could participate," she says.

York started her venture career by opening the Boston office of Comdisco Ventures, investing in biotech, medical devices and services, telecom, software, and computer hardware and components. After six years, the time was right for York and a coworker to strike out on their own and found Lighthouse Capital Partners, with offices in Cambridge and Menlo Park. An early investment from MIT led the way; many others followed. "We did six funds and invested in more than 500 companies," says York. "Having the opportunity to sit down with the founders of Netflix, Nvidia, Vertex, and Angie's List when they're doing Series A fundraising...how awesome is that?" Lighthouse's last fund closed a little over 10 years ago; by then, the firm had

invested more than \$2 billion in a roster of technology and health care companies that have reshaped their respective industries.

**"I'm working full time on things that really matter to me."**

The word that best describes York's current state is "redeployment," she says. "I'm working full time on things that really matter to me." York's younger brother died from complications due to schizophrenia shortly after she graduated from college. An early investor in companies devoted to brain research and therapies, she now oversees a venture-style fund dedicated solely to startups accelerating treatment options for mental health diagnoses. (One of those companies, Alto Neuroscience, went public in February.) In addition, York has served as a director for over two decades at One Mind, a nonprofit that brings together breakthrough research and entrepreneurship to catalyze substantive change in how mental health issues are treated and perceived.

Boston's Museum of Science is another long-time beneficiary of York's leadership; she started volunteering in 1986, joining the board of trustees in 1998 and serving as chair from 2015 to 2020. Today, she continues as an advisor. "I wanted girls to be comfortable in the areas of math and science, and the museum seemed like the best place to have that kind of impact," she says. For this and the other causes that engage her, York has a straightforward explanation—one with a direct connection to that curious girl growing up in Cleveland. "I get so much joy out of asking a question and then learning enough to support an answer," she says. "I love to turn learning into action."
